

Foundation for the Global Compact

WHY CONTRIBUTE?

As the UN Global Compact works to **accelerate** the initiative's transition from incremental progress in implementing corporate sustainability to **transformational action**, stable funding remains critical. Help us reach our annual fundraising goal! **Join hundreds of companies** – large and small – and make your 2014 annual contribution.

A Growing Movement

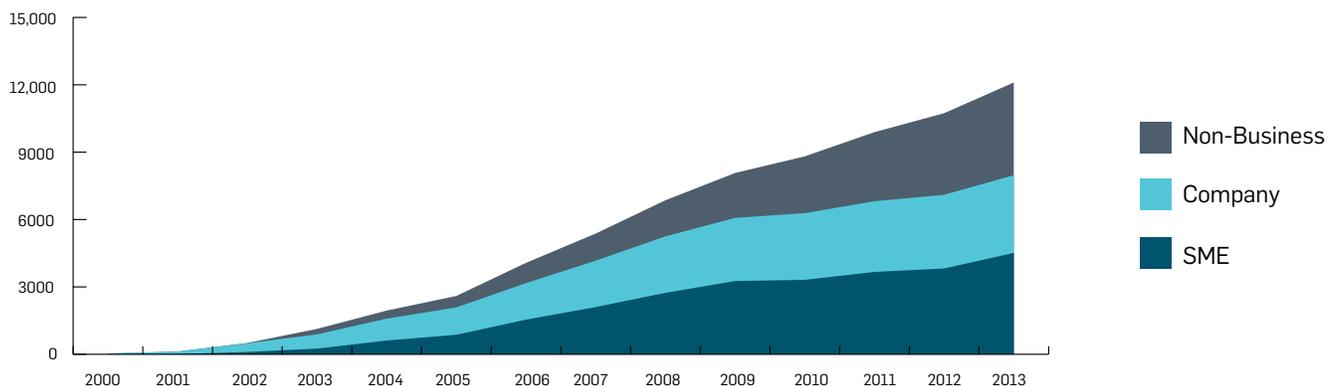

The UN Global Compact supports the sustainability commitments of more than 8,000 **business participants** and 4,000 non-business stakeholders in 145 countries. To **deliver increased value** to UN Global Compact participants like your organization, critical investments are being made across our portfolio of work, including in:

- **issue-based leadership**,
- **Local Networks** around the world,

- **multi-stakeholder events**,
- **improved participant engagement**, especially with small- and medium-sized enterprises (SMEs),
- **translation of key materials**, and
- **upgraded communications and IT resources**.

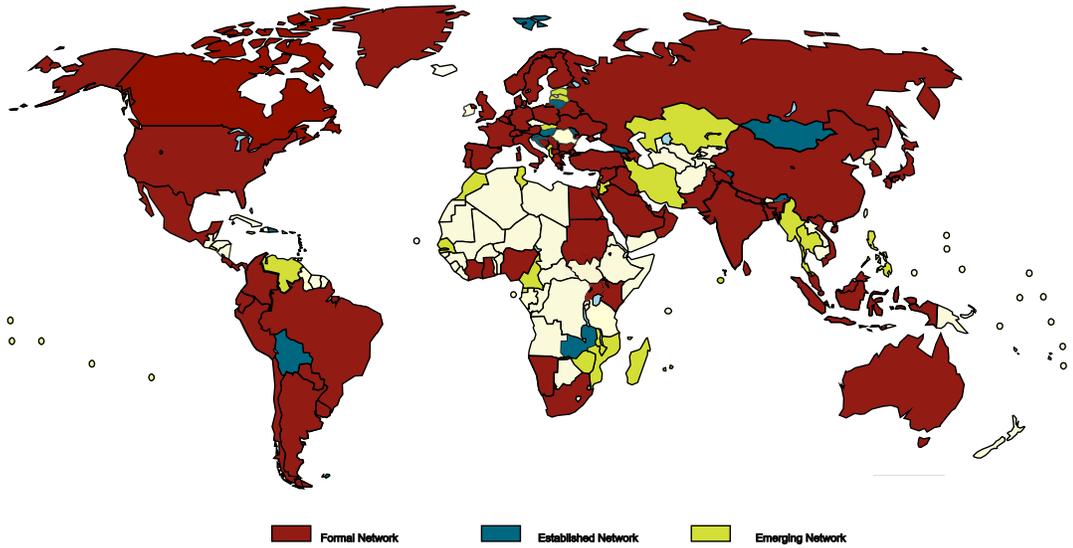

All companies are urged to make an annual contribution to help make these value-adding investments possible.

Strengthening Local Networks

Over 100 Local Networks perform a critical role in rooting the UN Global Compact within different national, cultural and language contexts. Your contribution to the Foundation for the Global Compact supports Local Network capacity building by funding key network meetings, trainings and improvements to network-specific tools and resources.

Increasing Impact through Issue Platforms and Workstreams

Funding from the Foundation for Global Compact directly supports our premier issue platforms for business to drive **widespread, specific and collective action**.

UN-Business Collaboration

To Engage responsible business in support of UN goals and issues, the UN Global Compact works to improve the quality and quantity of UN-business partnerships. Your contributions support the development of innovative tools like the **UN Global Compact Business Partnership Hub** (businesspartnershiphub.org), an online platform to connect businesses with potential partners in the areas of anti-corruption, climate and energy, social enterprise and water, as well as the UN System through the UN-Business Partnership Hub (business.un.org).

As Governments and the United Nations look ahead past the deadline of the Millennium Development Goals, the Global Compact has been asked to bring business perspectives and actions to the Post-2015 Development Agenda. To support the process, the UN Global Compact has put forth the *Post-2015 Business Engagement Architecture*, which was developed with support from the Foundation.

About the Foundation for the Global Compact

Established in 2006, the Foundation for the Global Compact is a nonprofit organization registered under New York State law. The Foundation is based on the principle that public-private collaboration is essential to find lasting solutions to pressing global problems. Contributions from business participants are vital to the initiative's ability to provide a valuable framework for corporate change and innovation around environmental, social and governance issues.
